Healthy City to Launch Version 3.0!

We need your feedback on how to improve the Healthy City website!

Focus Groups Announcement

Over the past couple of months the Healthy City staff has been working on ways to improve the www.healthycity.org site for easier use. We've been adding significant data and features to the site that will allow users to easily print maps and charts of neighborhoods, upload their own client or other data, save listings of favorite resources, etc. However we need your help to ensure that we add the most useful data features and mapping functions.

Join us for a focus group to share your opinions, criticisms and suggestions concerning your experience with the navigation of the website and your thoughts on the newly added data elements. We'd like to know how Healthy City can best support your research and data needs and make it easier for you to create rich maps and charts of demographic and health data, community needs, and the current health and socio economic status throughout the County.

We are looking for participants who have used the website (preferably on a regular basis) to participate in the focus groups.
