At First 5 LA, we don’t take such moments for granted. We know that each year, approximately 160,000 babies are born in Los Angeles County. And while every one of them deserves the chance to grow up happy, healthy and safe, not every child is given that opportunity.

Providing each precious life with a loving, nurturing and safe environment is a significant undertaking. Parents alone cannot do it. Teachers alone cannot do it. Health and social service providers alone cannot do it.

Since 1998, First 5 LA has been building a coalition to benefit the young children and families of Los Angeles County. To this end, we are uniting organizations, schools and communities and investing in innovative programs and services. Hand in hand, we are making a tremendous difference in our young children’s lives, through our hard work, our passion and our commitment.

As we reflect on what we’ve achieved together over the past year, we salute our valued partners, as well as all of you who share our passionate belief that our children deserve the best possible future and a chance to reach their full potential.

On behalf of the young children of Los Angeles, thank you for joining us on this journey.

Evelyn V. Martinez
Executive Director
Imagine a world where every child has the chance to **grow, learn** and **thrive**. It may sound like a dream, but First 5 LA is trying to make that dream a reality.

First 5 LA, originally known as the Los Angeles County Children and Families First - Proposition 10 Commission, was established in 1998. Since that time, we have invested more than $700 million in support of grants and programs to enhance the lives of the nearly 900,000 children through age five in Los Angeles County.

While First 5 LA’s initiatives serve a diverse population and represent a range of community needs, they each help to support our three focus areas of early education, health and safety for young children and their families.

In the pages to follow, we’ll highlight our achievements in these critical areas for fiscal year 2004-2005. Our aim is not only to show First 5 LA’s progress over the past year, but also to acknowledge the many families, agencies, educators, policy makers, businesses, and other stakeholders whose hard work and dedication have made this progress possible. To them we express our heartfelt appreciation, and thank them for continuing to care.
First 5 LA is a unique child advocacy organization established after the passage of Proposition 10, which invests tobacco tax revenues for programs to improve the lives of children through age five. Since 1998, we have been a pioneer in promoting early childhood development programs and a champion for health, education and safety issues that impact young children and families throughout Los Angeles County.

As our name implies, First 5 LA focuses on the first five years of life, a period in which a child’s brain develops most dramatically. Because our programs target this critical period, they not only enrich our young children today, but also establish a strong foundation for their future development.

To build this foundation, we are partnering with communities and families in Los Angeles County in support of three priority goals:

- **Health**
- **Early Learning**
- **Safe Children and Families**

These goals were established with input from our diverse communities and validated against local, state and national data to ensure that we were responding to the needs of our young children and families.

First 5 LA is committed to making significant and measurable progress towards these goals, so that each child in Los Angeles County can have a place to grow, a place to learn, and a place to thrive.
First 5 LA believes every child deserves to grow up healthy and strong, with access to affordable health care coverage and quality services. To promote Health, First 5 LA funds programs that enhance early childhood health and development.

Healthy Kids
Through Healthy Kids, First 5 LA is making progress towards its vision of universal health care coverage for all children. This free or low-cost health, dental and vision insurance program provides coverage for children through age 5 in Los Angeles County who do not qualify for state programs, and funds efforts to keep eligible families enrolled in health care coverage.

First 5 LA has committed $100 million over five years to support Healthy Kids. We have made great strides in our outreach and enrollment efforts, exceeding our initial enrollment target of 50% of eligible children by June 30, 2005. And, thanks to additional funding secured by the Children's Health Initiative Coalition of Greater Los Angeles, Healthy Kids has extended eligibility for coverage to children ages 6 to 18.

LA Best Babies Network
The past year marked the launch of LA Best Babies Network. First 5 LA created LA Best Babies Network, which provides pregnant women with health, education and social service programs to improve their chances of having healthy full-term births. Research shows that women who have access to quality, affordable care and services, beginning in their first trimester, have babies with fewer complications. As these babies mature, they are less likely to have health and/or developmental problems.

First 5 LA has committed $15 million over three years to support LA Best Babies Network, the cornerstone of our Healthy Births Initiative. The Network offers quality prenatal and postnatal education and resources which we hope will enhance the health and well-being of mothers and their infants.

Kit for New Parents
To provide support to new and expecting parents, First 5 LA played an integral role in the distribution effort of First 5 California’s Kit for New Parents, a comprehensive resource that offers a wealth of practical information and resources on parenting.

The Kit for New Parents includes a set of educational videos, supporting brochures, a Parents Guide which links parents to telephone and internet resources, and a child’s book to encourage parents to reach out to their babies and young children. The materials cover a range of topics, including prenatal care, early childhood development, nutrition, health, safety and child care.

Over time, the Kit for New Parents will be available in several languages to serve our diverse communities. Currently, First 5 LA parenting Tip Sheets offer support to the Farsi-, Armenian-, Chinese-, Korean-, Laotian-, Khmer- and Russian-speaking communities.

“I can be ‘worry-free’ about costs for my kids’ health care. It’s so affordable compared to being uninsured.”

Parent of Healthy Kids enrollee
How First 5 LA is Helping Children Grow

• First 5 LA’s Healthy Kids Initiative is providing Los Angeles County’s young children with increased access to health care coverage. Recent expansions of coverage, first to young children and more recently to older children, have helped lower the uninsured rate of children in Los Angeles to 10%.

• LA Best Babies Network is one of the nation’s largest efforts to provide prenatal and postnatal education and resources to women. Nearly all of the 160,000 women giving birth annually in Los Angeles County will benefit from the Network.

• First 5 LA invested nearly $400,000 to support the Kit for New Parents distribution effort. As of June 2005, more than a half-million kits have been distributed to parents throughout Los Angeles County.
Learning opens the doors to growth, enrichment and opportunity throughout our lives. To promote Early Learning, First 5 LA is partnering with families, educators and community members on early learning and education programs to provide our children with the skills and resources to succeed in school.

**Los Angeles Universal Preschool (LAUP)**
Research shows that children who attend quality preschool programs are more likely to succeed, in school and beyond, than those who do not. First 5 LA is striving to provide all four-year-old children in the county access to these programs through LAUP, a new public benefit corporation dedicated to increasing access to quality preschool.

First 5 LA has committed $600 million over five years to this preschool initiative. Thanks to this significant investment, LAUP is creating new, high-quality preschool programs in areas that need them most, and providing new resources to improve the quality of existing programs. By the end of the first program year, LAUP will support operations in more than 200 preschool centers and Family Child Care homes serving more than 5,000 children, and will have created nearly 2,300 new, high-quality preschool spaces.

**School Readiness**
We all play an important role in getting our children “ready for school.” Our School Readiness Initiative engages families, community members, and educators through social and health services to prepare our children to begin elementary school and help them adjust successfully to this new environment. This initiative provides early learning services to children, learning opportunities for parents, and a broad range of services for families to help them support their children's development.

Approximately 200 elementary schools representing 14 school districts are participating in this initiative. Over the 2004-2005 grant year, School Readiness served 24,316 parents/families and 22,226 children through age five; nearly 15% of these children were reported as having special needs.

**Family Literacy**
First 5 LA believes parents play a primary role in early learning because they are their children's first and best teachers. Our Family Literacy Initiative gives parents resources to enhance their own literacy and learning development, so they can offer their children a positive environment for learning.

First 5 LA has invested $13 million to support Family Literacy. These funds provided direct services to families, as well as training and technical assistance to enhance the services of program grantees. A 2005 evaluation of First 5 LA initiatives showed that parents participating in Family Literacy programs demonstrated significant growth in behaviors that support their children's learning.

“I wish I had this education when I had my first child who is already a teenager. I can see the difference now.”

School Readiness Initiative parent
Currently in Los Angeles County, only half of our four-year-olds have access to any preschool at all. LAUP’s goal is to make high-quality voluntary preschool universally accessible to every four-year-old in Los Angeles County.

LAUP is enhancing the quality of our preschool programs by providing expert coaching and technical assistance and establishing a clear and equitable monitoring system for programs and providers.

First 5 LA has committed $134 million over four years to support School Readiness. This sum includes a dollar-for-dollar match from First 5 California.

Family Literacy targets high-need families. More than two-thirds of these families reported a household income of $20,000 or less. Seventy-nine percent of parents had no previous schooling in the United States and more than one-third of them had an 8th grade education or less.
Growing up in a safe, secure and loving environment is essential for children to thrive and reach their full potential. To promote Safe Children and Families, First 5 LA funds programs that offer families support, information and resources to help them provide a physically and emotionally safe environment for their children.

**First 5 LA Connect**
To reach out and communicate with underserved communities, First 5 LA created First 5 LA Connect, a confidential help line and website service for expectant parents, parents and caregivers. The service offers trained specialists and experts to respond to callers' needs, with a special focus on health, parenting and education. To serve our diverse communities, First 5 LA Connect provides support in a wide range of languages, including English, Spanish, Mandarin, Cantonese, Korean, Vietnamese, and Armenian.

First 5 LA invested $14 million to support First 5 LA Connect. Until June 2005, First 5 LA contracted with NexCare Collaborative, Inc., a resource and referral service, to operate First 5 LA Connect. In July 2005, in order to provide round-the-clock service, First 5 LA contracted with 211 LA County, formerly known as INFOLINE of Los Angeles. 211 LA County is a county-wide resource and referral service staffed 24 hours a day, seven days a week.

**Partnership for Families**
Community-based family resource services can play a pivotal role in supporting high-risk families and keeping children safe.

To offer critical guidance and assistance to parents in need, First 5 LA has launched Partnership for Families, a child abuse and neglect prevention program.

To further this initiative, First 5 LA is partnering with the Department of Children and Family Services (DCFS) in a joint effort to prevent child maltreatment by ensuring that all children live in physically and emotionally safe environments. This partnership will enable both organizations to leverage prevention resources, share pertinent information regarding best practices and child/family outcomes, and ultimately work to transform the system of care for children across the country.

**Safely Surrendered Baby (SSB)**
To raise awareness of California's Safely Surrendered Baby Law, First 5 LA generated more than 25 television, radio and newspaper stories in 2005, highlighting successful surrenders and the importance of this law. First 5 LA has also distributed tens of thousands of SSB brochures in English and Spanish at more than 40 community events during 2004-2005.

First 5 LA hopes that raising awareness of this law will give babies who might otherwise be harmed or abandoned the opportunity to have a safe haven and a chance at life.
• Nearly half the calls received by First 5 LA Connect concern health insurance needs. This call volume reflects the great need for information about and access to such critical coverage in our communities.

• 3,469 children have been enrolled in Medi-Cal, Healthy Families and Healthy Kids insurance programs through First 5 LA Connect.

• First 5 LA helped raise public awareness about California’s Safely Surrendered Baby Law, which allows a parent or legal guardian to confidentially surrender an infant within 72 hours of birth to any hospital or fire station. Between January 2004 and December 2005, 17 babies were safely surrendered in Los Angeles County.

• In 2004, the Department of Children and Family Services (DCFS) conducted 141,652 child maltreatment investigations; 50,226 were for children younger than five years of age. To prevent child abuse and neglect in our communities, First 5 LA is partnering with DCFS to implement Partnership for Families.
