APPLICANT NAME:

REVIEWER ID:

SUMMARY SCORES:

Score (99)

II Understands the scope and has sample solutions and options. XX (25)

III Demonstrates successful implementation of similar projects. XX (20)

IV Demonstrates expertise with conceptual data models and creating an application database. XX (19)

V Understands and demonstrates expertise in data integration and data translation of applications. XX (20)

VI The proposed time line and budget are realistic and incorporated specific tasks, contingencies and project communication methods. XX (15)

TOTAL SCORE: XX (99)
I. Understands the scope and has sample solutions and options 25 points

This criterion reflects the applicant understands the scope, requirements, complexity and challenges of the project. In addition, the applicant has presented sample solutions or options based on the information provided.

Note: Any notes and/or questions should be included on a separate piece of paper

Score: (maximum score = 25)

II. Demonstrates successful implementation of similar projects 20 points

This criterion reflects whether the applicant has successfully designed, developed and implemented similar projects in scope, time and cost. The applicant’s proposal demonstrates knowledge and expertise working with functional requirements, and design features to build a custom application.

Note: Any notes and/or questions should be included on a separate piece of paper

Score: (maximum score = 20)

III. Demonstrates expertise with conceptual data models and creating an application database. 19 points

This criterion reflects the applicant’s experience working with ECDM (Enterprise Conceptual Data Model) how to transform and build a physical database from it.

Note: Any notes and/or questions should be included on a separate piece of paper

Score: (maximum score = 19)

IV. Understands and demonstrates expertise in data integration and data translation of applications 20 points

Demonstrated experience with designing, developing, and implementing services to support data integration and data translation from custom forms and third-party applications into a custom application

Note: Any notes and/or questions should be included on a separate piece of paper

Name of Applicant:
V. The proposed time line and budget are realistic and incorporates specific tasks, contingencies and project communication methods 15 points

This criterion reflects the extent to which the applicant’s proposed task list, associated budget and timeline are realistic. The proposed task list incorporates known and unknown contingencies, methods of communicating periodic progress report and invoicing associated with tasks completed.

Note: Any notes and/or questions should be included on a separate piece of paper

Score: (maximum score = 15)
