- CCDBG Award
- P-5 High Need Index

Low need
Low to Avg Need
Average Need
Avg to High Need
High Need

NOTES & SOURCES

CCDBG ARRA awards are mapped by the recipients’ addresses and not the location of where services are provided. This reflects a limitation of the data. At times, the recipient address and service location may be the same.

The P-5 High Need Index was developed by Healthy City, Advancement Project, 2010. The index includes the following indicators:
1. Population aged 0-5
2. Families at or below 100% of the federal poverty line
3. Number of births < 1,500 grams (very low birth weight)
4. Adults with < high school diploma
5. Number of teen births

Index scores were derived by calculating the distance each zip code is from the county average.

Sources:
ARRA award data from www.recovery.gov and www.recovery.ca.gov
Sources for High Need Index:
Demographic data from Nielsen/Claritas, 2009 Estimates;
Birth data from California Department of Public Health, 2008 (most recent year available).
