We're making Change for Babies
So why are we talking cents?

Change: because in 2008 our Capitol Day is moving to February 6th. This will better accommodate the schedule of our volunteers and take advantage of the 2008 legislative calendar.

Change: because everyone can spare a penny. All it takes is one penny - old or new - to provide life saving food and formula for California babies born with a metabolic disorder.

Change: because March of Dimes has a history of passing laws in California that improve the health of babies. 2008 will be our most aggressive advocacy agenda ever.

Capitol Day 2008 - Join us February 6 - Sacramento, CA

Decades ago we asked for dimes to change the world and eradicate polio from America. We succeeded. Today, March of Dimes is asking for pennies to show our elected officials how little it takes to make change in California. And since everyone can spare a penny, it won’t take much to get our message across. Once again we will succeed in saving babies in California. One penny a month is all it takes for insurance companies to help families pay for the foods that will save the life of a sick child.

One Penny That Makes Cents

Join us February 6 in Sacramento as we talk to elected officials about several issues that will help moms and babies in California. Our 2008 agenda includes:

- Coverage of Metabolic Foods
- California’s Birth Defects Registry
- Improving the Health of Women Before Pregnancy
- Statewide Health Care Reform

To join us for Capitol Day, register online at [www.MarchofDimes.com/ca](http://www.MarchofDimes.com/ca) or call 916-922-1913. It won’t take much for you to help us make change!
