Swimming Pools in backyards account for over half of the 51 drowning deaths of children 0–5 years old each year.

Install alarms on house doors and windows leading to a pool area.

Layers of protection include adult supervision, fences, gates, latches, safety pool covers, alarms, education, throwing aids, and rescue techniques.

Eye. Adults should keep a constant eye on children in or near any water including bathtubs, buckets, toilets, ponds, spas and pools.

Never leave a child alone near water. Check the pool first if a child is missing.

Touch. Designate an adult to be close enough to reach out and touch the child under 4 years old while being supervised in the water.

There are NO WARNING SOUNDS or splashing sounds associated with a drowning accident.

Drowning is Preventable!
