SUMMARY:
The workshop will examine the medical approach to the child who presents with evidence of growth impairment. Key factors such as the birth and medical history as well as the physical findings will be reviewed and their relevance to growth impairment will be discussed. The workshop will be case-based and examine the multiple biological and environmental factors that impact on a child’s growth and delineate strategies to rectify adverse conditions.

LEARNING OBJECTIVES:
At the end of the session the participant will be able to:
1. List pre and perinatal factors that impact on infant growth.
2. State the characteristics of children with environmental failure to thrive.

Fulfills 3 hours of California Training Guideline C.

Continuing Education Requirements: CE's are offered for PSY, MFT, LCSW, BRN and AMA PRA Category 1 and CMA.
