Description: CalWORKs child care subsidies allow families currently or previously on public assistance to work towards self-sufficiency. CalWORKs child care is a voucher-based system, which means families can choose the type of child care that best meets their needs: family child care home, child care center, license-exempt care. Understanding the system is complicated by its division in 3 stages, with different criteria and rules. Join us in learning more about the 3 stages of CalWORKs child care, the administration of the program, common issues facing child care providers in getting paid, and best practices to put in place when participating in the program to help ensure that providers are timely paid. Please feel free to come to the seminar with any specific questions about CalWORKs child care.

Price: This seminar will be offered without charge.
