II. BACKGROUND

A. FIRST 5 LA

In 1998, California voters passed Proposition 10, which levied a 50-cent per pack tax on all tobacco products. The resulting tax revenues were earmarked within each county in California to enhance the early growth experiences of children, enabling them to be more successful in school and ultimately to give them an equal opportunity to succeed in life. In Los Angeles County, First 5 LA (also known as the Proposition 10 Commission) was formed as a public entity to develop and oversee various early childhood initiatives and to administer and manage its share of the funding from Proposition 10. Since 1998, First 5 LA has invested over $871 million to champion health, education, and safety causes concerning children prenatal through five and their families. Additional information regarding First 5 LA may be found at http://www.first5la.org.

First 5 LA Fiscal Year 2009–2015 Strategic Plan

In June 2009, the First 5 LA Board of Commissioners adopted its FY 2009–2015 Strategic Plan entitled Strengthening Families and Communities in L.A. County. This Plan incorporates lessons learned from the first 10 years of First 5 LA’s grantmaking and research, which reveal not only the importance of supportive and informed parents and caregivers to a young child’s quality of life, but also the role of safe and supportive neighborhoods, or places, to that child’s development.

As a result, this new plan represents a major shift in First 5 LA’s grantmaking from an initiative-based to a place-based approach. This new approach will allow First 5 LA to focus on strengthening families while fostering the communities’ ability to create and sustain safe and nurturing places for children to grow and thrive.

In the Plan, the Commission established four specific outcomes that it seeks for young children in L.A. County. These outcomes are defined in the Plan as four long-term goals of ensuring that children:

- Are born healthy
- Maintain a healthy weight
- Are safe from abuse and neglect
- Are ready for Kindergarten

All of First 5 LA’s investments will be focused on changing outcomes in these areas and breastfeeding is an important activity.

Breastfeeding promotes optimal health, cognitive development, and bonding of infant-mother. Breastfeeding mothers need support and skilled assistance in the hospital to ensure that good initiation of breastfeeding. The Baby-Friendly Hospital (BFH) Project will enhance and support a continuum of care to improve initiation and duration of breastfeeding by improving breastfeeding policies and procedures in birthing hospitals and increase capacity to meet the need of families through improved workforce competencies in infant and toddler issues in the health sector.
This improvement in breastfeeding policies will also support the outcome of strengthened “attachment and bonding” between mother and child as it is aimed at increasing exclusive breastfeeding. These outcomes further support the goals outlined in the new Strategic Plan in the goals of ensuring that children maintain healthy childhood weight and are safe from child abuse and neglect.

**B. BREASTFEEDING**

There is overwhelming scientific evidence that breast milk is the optimal food for infants and provides numerous health benefits to the infant and mother. However, babies are not breastfed due to different causes. The strongest risk factors for early breastfeeding termination are late breastfeeding initiation and supplementing the infant\(^1\), making imperative that hospitals adopt and follow institutional policies that protect, promote and support breastfeeding. Institutional changes in maternity care practices effectively increase breastfeeding initiation and duration\(^2\) as most children are born in a hospital or birthing center.

Unfortunately, in Los Angeles County, the 2007 average exclusive hospital breastfeeding rate at discharge is 24.1%, compared with California’s rate of 42.7%\(^3\).

In an effort to improve exclusive breastfeeding rates at hospital discharge, and therefore improving overall exclusive breastfeeding rates, the First 5 LA Commission has chosen the Baby-Friendly Hospital Initiative, an established “best practice” that is evidence-based as a model of funding.

The *Baby-Friendly Hospital Initiative* (BFHI) is a global program sponsored by the *World Health Organization* (WHO) and the *United Nations Children’s Fund* (UNICEF) to encourage and recognize hospitals and birthing centers that offer an optimal level of care for lactation. In the United States, birth facilities that have achieved BFHI designation typically experience an increase in breastfeeding rates\(^4\). There is a relationship between the number of BFHI’s “Ten Steps to Successful Breastfeeding” in place at a birth facility and a mother’s breastfeeding success. These “Steps” are policy changes to implement changes in practices within the hospitals.

III. BABY-FRIENDLY HOSPITAL PROJECT

A. PROJECT ALLOCATION

The First 5 LA Board of Commissioners recognizes the great need in LA County to improve breastfeeding rates. This Baby-Friendly Hospital Project is a key activity for the new Strategic Plan (FY 2009-2014) with a total allocation of up to $10,500,000.

It is well established that breastfeeding promotes optimal health, cognitive development, and bonding of infant-mother. Breastfeeding mothers need support and skilled assistance in the hospital to ensure good initiation of breastfeeding. For many women, the hospital is the only source of breastfeeding support and education. Exclusive breastfeeding during the hospital stay is one of the most important influences on how long babies breastfeed exclusively after discharge. Babies who are fed breast milk exclusively in the hospital are more likely to receive only breast milk at home and to breastfeed for a longer period of time, increasing the benefits of breastfeeding. Therefore, it is critical that First 5 LA includes strategies to improve breastfeeding initiation and duration.

The $10.5 million BFH Project allocation includes funding for:

1. Outreach to Hospitals
   a. Establishing a “BFH Advisory Workgroup” ($100,000)
   b. Hiring a consultant to support the Workgroup objectives in surveying the needs and level of readiness of hospitals to implement a Baby-Friendly Hospital Project ($400,000)
2. Establishing a pilot project in partnership with California Hospital Medical Center (CHMC) ($500,000)
3. Identifying and providing resource support for implementation of the Baby Friendly Hospital Project based on Workgroup findings and recommendations at up to 19 additional hospitals in LA County with poor exclusive breastfeeding rates ($9,000,000)
4. Evaluation ($500,000)

B. FUNDING TO HOSPITALS

This RFP to hospitals is offering funding for 1) training of staff and 2) operational support to hospitals that are willing, ready and able to embrace and implement policy changes recommended by Baby-Friendly USA. Staff anticipates that operational costs may include the following areas:

- Staff time to attending training
- Assessment fees payable to Baby-Friendly USA
- Some administrative costs (i.e., data collection and recording staff and project coordinator on part-time basis only unless special need is demonstrated)

The Commission expects to enter into a contract with each selected hospital which will be eligible for renewal at the end of each contract year. The contract may potentially be renewed for 24-36 months. The total contract amount for the entirety of the Project will
not to exceed $473,000 for the entirety of the Project.

Funding for new hospitals will be available yearly on a competitive, first-come-first-serve-basis contingent upon availability of funds.
